Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

I was looking for a book on evolution to give to a child who was asking questions about the subject. I found this book in eyewitness fashion to be low on text but told its story through many engaging interesting pictures. The book sensitively dealt with questions of creation and biblical questions relating to evolution, answering them with scientific and historical information. It also provided multicultural references and included creation stories from non-western cultures as well. This book is a must for high school or even junior high science teachers who are faced with justifying teaching their subject matter to parents, board members and community members. Not to mention, its a beautiful descriptive book that is a welcome addition to any general level scientific book collection.

This is a great book dealing with some really tough issues and it does it well. The book starts out with creation stories, and goes on from there. Great resource.

So impressed with the speed in delivery, as well as the great condition of the book. WOW! It came with the clip art CD intact as well as a full color large poster. I will seriously enjoy implementing the use of this resource in my curriculum. This is coming from a current childcare instructor and soon to be general ed teacher.
