Customer Reviews

While this book is basicly aimed at 9 to 12 year olds, I, as an adult found it very facinating. There are about 70 pages packed with dozens of stunning color photos of stone tools, art, early weapons like arrows, iron or bronze knives and swords, jewelry and clothing. There is also a brief section on diet. In short, all the handiwork and customs of early man are touched upon. The text is brief but the photos and pictures say a lot. The depictions of early man himself by the authors seem less important, I believe, than his creations. The species of man that is discussed is for the most part limited to homo sapiens and neanderthal. This is a splendid book that anyone interested in the subject would enjoy owning. I am looking foreward to other books in the series.

I liked this DK book: Early Humans. I like all of the DK books that I have purchased and most of them have been read more than once. I find that the second time around I discover things I missed on the first reading.

I am so glad I bought this book, my students refer to it again and again, very useful. Good price and fast delivery.

Excellent book. Very informative. Highly recommend. DK Books are one of my son’s favorite series of books.
