# National Geographic Readers: Water

## **Synopsis**

Water is all around us; we drink it every day. In this level 3 reader, kids will learn about the water cycle, discovering how rain and snow flow into our lakes, rivers, and oceans, and later evaporate into the sky again. Vivid photography and accessible text make this book an ideal introduction to the science of water.

Grade Level: 1 - 4

## **Customer Reviews**

Got this for our Brownie Wonders of Water Journey as an additional resource. Our school uses the "AR" reading scoring system and this is in their listing so the girls could get points. Not all of the other extra books I looked at provided this extra incentive.

My son is in love with National Geographic books. He loved this book and we added it to his collection. Great pictures, right on Target for reading level and happy to have reading material to fill his mind and time.

Like all the books in this series, nicely written, great photos and good overview of information.

The national geographic level 2 and 3 readers have made reading so much more fun!

You can't go wrong with this National Geographic book. Large print, too.

Apt for 4 years old and above. Informative and nicely illustrated.

It was fun and informative for my grandson.

Grandson was very interested.
