Grade Level: Preschool - 3

Customer Reviews

We Both Read: About The Ocean by Sindy McKay is beautifully illustrated with color photography and focuses on the many aspects of an ocean environment from coral reefs to deep seas to sandy shores. A wealth of interesting and fun facts about life in the ocean includes dolphins, sharks, whales, starfish, and more!

I absolutely love the We Both Read book series!This is a great way to spend time with your child learning to read.One page is for parents and the other is for the child.You can make it a little more challenging as your child's reading level advances having them try to read the parent page.I would recommend this book and any other in this series to everyone with a child learning to read.

About the Ocean is a great introduction to science for young readers. It contains lots of very interesting facts about life in the ocean and the book is written in a way that any difficult words are

first read by the parents in their text, so the child is exposed to it already when it is their turn to read it. Wonderfully colorful pictures also lead the child's reading. As someone who has 20 years in education, I can tell you it is a great educational tool.

School Reading specialist recommended the 'We Can Read' Books for my 9 yr old who has a hard time in wanting to read. She loves the interaction of reading together. She loves animals & sea creatures too, so she actually 'wants' to read, for a change. I bought seven 'We Can Read' books and they work in getting her to read!!

My 5 year old loves anything about animals and loves this book! The We Both Read books are lots of fun for kids. I have a teenager who enjoyed them when he was little too.
