Age Range: 7 - 10 years

Grade Level: 2 - 5

Customer Reviews

Love! Love! Love! This series!! I'm getting them all if that tells you anything. These pack a lot of info in a fun unique way. My kids carry them everywhere and have started really "Investigating". I have a lot of nature books but this series is my favorite so far. My children are 5 years apart and it works just as well for both of them while making me happy with real facts.

This book gives general information about a various different selections of nuts, seeds, and berries. It is wonderful, my 8 year old sister found it to be quite fun and learned much from it. This book would be great for any child wanting to learn and have fun. I would suggest it for ages 5-11

I bought this book because I do not know very much about plants, but would like to learn everything

I can. Obviously a quick read for me, but I learned some things I didn't know and confirmed some things that I already did.

My son is a nature nut. He is 6. I purchased this book, as well as others of the same type about insects, rocks, fossils, and butterflies. He absolutely loves them, and they are very informative as well. We homeschool, so I can actually use these as educational tools as well.

This book contains descriptions for 10 berries, 8 tree nuts and 10 different seeds. It is an okay book for Wisconsin. For each description, it contains what it looks like, predators that eat it, and an interesting fact. The illustrations are nice because they contain both a close up view and a farther away view. The projects are very doable by 8-12 year olds with little needed help from parents. I would highly recommend this for any kid that likes to be outside and exploring nature.

I was impressed with this book because it expanded my horizon. It helped me to learn new nuts berries and seeds i could incorporate into my diet.

We love this book. Our 5 year old is very engaged by it. Great choice for teaching the berries, nuts and seeds in our area.

The grandkids and I enjoy reading this book and it's handy to take along on little field trips. Great little book.
