Age Range: 6 - 10 years

Grade Level: Preschool - 3

Customer Reviews

Seymour Simon has a lot of very nice little books for children. This is one about Mountains. The photos are stunning, well-chosen, and the lessons can be digested by early childhood children. It prepares them for 8th grade science, earth science/geology, and helps built in them appreciation for the earth, its formation, giving them insight into volcanoes as well, something most children are fascinated with. It is a book that children can read or just thumb through he pictures with. Recommended supplementary science book. Most of Seymour Simon's books are very good, as is this one.

Perfect!

Great book, containing quality photos. If you have interest in photography and nature scenes (mountains) buy this book. The hardcover have a lot of quality , a must buy !

This book is very very good, striking photos of mountains, very good quality paper and some dazling scenes. If you have interest in photography and in nature scenes (mountains) buy this book !
